

Maintenance Instructions Rubber Sport Flooring

Clean and maintain **Rubber Sport Flooring** using the following procedures.

- Sweep or vacuum any loose dirt or foreign material after installation.
- Dilute 2-3 oz. of **Taski Profi** per gallon of warm water (5-10 oz. if heavy soil).
- Distribute diluted solution and let stand for 5-10 minutes.
- Scrub or agitate as required using a mop, automatic scrubber or single-disc floor machine.
- Pick up slurry with mop and bucket or wet vacuum
- Rinse floor thoroughly with clean warm water.
- Dilute 2-4 oz. of **Taski Wiwax** per gallon of warm water into mop bucket or automatic scrubber and apply a thin coat of solution over entire floor and let air dry. This will leave a light polymer and wax film for additional protection. Repeat this step if a higher shine is required.
- Repeat the above steps as necessary as part of the ongoing maintenance program.
